Case Study The Zachman Framework

The Zachman Framework is an enterprise ontology and is a fundamental structure for Enterprise Architecture which provides a formal and structured way of viewing and defining an enterprise. The ontology is a two dimensional classification schema that reflects the intersection between two historical classifications. The first are primitive interrogatives: What, How, When, Who, Where, and Why.

Zachman Framework - Wikipedia

The Zachman Framework, originally conceived by John Zachman at IBM in 1987, is a framework for enterprise architecture, which provides a formal and highly structured way of viewing and defining an enterprise.. The Framework is used for organizing architectural "artifacts" in a way that takes into account both who the artifact targets (for example, business owner and builder) and what ...

A regret minimization framework is a business heuristic that enables you to make a decision, by projecting yourself in the future, at an old age, and visualize whether the regrets of missing an opportunity would hunt you down, vs. having taken the opportunity and failed. In short, if taking action and failing feels much better than regretting it, in the long run, that is when you're ready to go!
