10 Energy, Work, and Simple Machines

CHAPTER Practice Problems 10.1 Energy
and Work pages 257–265 page 261 1.

Refer to Example Problem 1 to solve the
following problem. a. If the hockey
player exerted twice as much force, 9.00
N, on the puck, how would the puck's
change in kinetic energy be affected?
Because $W = Fd$ and $\Delta KE = W$, doubling the

Physics Chapter 10: Work, Energy and Machines Flashcards ...

The concepts of work and energy are closely tied to the concept of force because an applied force can do work on an object and cause a change in energy. Energy is defined as the ability to do work. Work. The concept of work in physics is much more narrowly defined
