The fourth graders who had been assigned homework on this material performed better on the textbook's unit test, but did not do any better on a standardized test. And the third graders who hadn't done any homework wound up with higher scores on the standardized test.[36] Like the other three studies, the measure of success basically involved ...

Does Homework Improve Learning? - Alfie Kohn

Coefficient of determination (r^2 or R^2) A related effect size is r^2 , the coefficient of determination (also referred to as R^2 or "r-squared"), calculated as the square of the Pearson correlation r . In the case of paired data, this is a measure of the proportion of variance shared by the two variables, and varies from 0 to 1.
