## **Climatologie**

Climatology (from Greek κλίμα, klima, "place, zone"; and -λογία, -logia) or climate science is the scientific study of climate, scientifically defined as weather conditions averaged over a period of time. This modern field of study is regarded as a branch of the atmospheric sciences and a subfield of physical geography, which is one of the Earth sciences.

### **Introduction au chapitre 5 - Météorologie et climatologie**

Climate variability: Climate variability describes short-term (lasting years to decades) changes in climate caused by naturally occurring events like El Niño, volcanic activity, or changes in the sun's activity (solar cycles). Climate change: Climate change is a warming or cooling in long-term (lasting decades to millions of years) weather patterns, at different places around the world.
