The study found women are particularly inclined to be turned on when they feel they're being viewed as attractive and desirable by another person—and this actually emerged as being the most significant factor of the three in determining female desire. "Women often adopt an erotic self-focus, instead of a relational one, during sexual activities with a partner," the researchers explain.

Tantric sex is a sexual practice that's part of the ancient spiritual path known as tantra. Tantra (pronounced tahn-tra, with an ahh sound in that first syllable) is a Sanskrit term that translates to "weave." It refers to weaving together or uniting the masculine and feminine forces within all of us, heaven and earth, the human body with the transcendent, collapsing the polarities.
