Subwoofer Installation Guide
A subwoofer (or sub) is a loudspeaker designed to reproduce low-pitched audio frequencies known as bass and sub-bass, lower in frequency than those which can be (optimally) generated by a woofer.The typical frequency range for a subwoofer is about 20-200 Hz for consumer products, below 100 Hz for professional live sound, and below 80 Hz in THX-certified systems.

Subwoofer - Wikipedia
*Standard installation does not include vehicle-specific parts or accessories. For single subwoofer installation, the cost of parts will vary. Such parts and any additional parts or extensive labor are extra.

Single Subwoofer Installation (Hardware Not Included ...
Using a subwoofer cable (RCA cable), connect the subwoofer to the AV receiver by running the cable from the receiver's subwoofer output to the subwoofer's line input. Klipsch subwoofers can be connected via the LFE channel, the white RCA connection, or in a stereo pair by using both the white and red RCA connections.

How to Connect a Subwoofer: A User's Guide | Klipsch
Get a wiring kit with all the supplies needed for the installation. Your subwoofers don't come with wiring, so you have to buy it on your own. The easiest way to do this is to shop for wiring kits. The kit should include several different types of wires over 16 ft (4.9 m) long and some connectors to use during the wiring process.

Subwoofer Enclosures and Boxes at OnlineCarStereo
The box style or shape refers to the actual shape of the box. Square and rectangular boxes are straight-edged boxes on all sides, whereas hatchback and truck style enclosures feature an angled front or back design that allows for installation in places short on depth such as single cab pickup trucks. You can also use such enclosures in hatchback cars or other vehicles where space is a premium.
