Legislative constraints in terms of architecture refers to things that by law must or must not be done. There are many different constraints that an architect faces when designing a building but in this post I will only be referring to those enforced by law. Firstly, one of the main legislative constraints are the building regulations.

Similar to the way that RBAC resources control user access, administrators can use Security Context Constraints (SCCs) to control permissions for pods. These permissions include actions that a pod, a collection of containers, can perform and what resources it can access.You can use SCCs to define a set of conditions that a pod must run with in order to be accepted into the system.
