The starter motor on the D1-30, and I suspect quite possibly on the D1-20 too, has a far higher current demand than the starter motor on the 2030 which it replaced. The problem was solved in my case by beefing up the cabling. I would suggest you check the voltage drop at the starter motor and see what you are getting. 14 Apr 2016

Volvo Penta makes some nice engines, although they do come in all shapes and sizes, and some smoke like chimneys, some are workhorses, and no matter what, the parts are extremely pricey. Any input would be greatly appreciated, as I like the boat but I am just a little skeptical on the engine itself, it's the one unknown. Thanks in advance, fellas.
